Textbook of Bakery and Confectionery

Textbook of Bakery and Confectionery to provide students theoretical knowledge based on National Council of Hotel Management's diploma in Bakery and Confectionery course including commodities, food costing, hygiene and sanitation. Learning how to produce bakery and confectionery products allows the baker to produce quality products based on established procedures. This is accomplished by the study of theory and practicing skills basic to the production of food along with function of ingredients, mixing methods, food laws according to FSSAI, HACCPs, food hygiene, sanitation and cleaning procedures. This book has been mainly designed to serve as a text cum reference book for the student pursuing courses in catering and nutrition science, home science, hotel management, national council for vocational training apprentice, national skill development corporation, craft baker, baking technician and other aspiring bakers in food industries.

Khetarpaul, Neelam et al
ISBN: 9789390435258 (HB)

Bakery Science and Cereal Technology

Bakery Science and Cereal Technology is one of the important courses being offered to undergraduate students as a professional elective. Through this course the students shall acquire adequate knowledge of structure, nutrient composition and processing of various cereals particularly those which are used in bakery industry, milling of wheat, physico-chemical and functional properties of cereals, role and storage of ingredients used in baking, types and grades of flour, baked products prepared by hard and soft wheat, viz., bread, cakes, crackers, cookies, wafers etc, losses in baking, quality evaluation, standards, packaging and sale of bakery products, and prospects and problems of bakery industry. This book containing the above information can also be used as a technical guide and reference book to personnel engaged in bakeries.
